Florida Liquid Ceramic
3953 Forsyth Road
Winter Park, FL 32792

Dear Sir,

One year ago, I had extensive repair work done on my then 4-year-old home secondary to water damage. The exterior of my home also had a lot of settling cracks visible in the stucco. The exterior paint was beginning to look a little 'chalky'. I knew that the house needed to be painted but I was afraid that within a few years new settling cracks would require painting again. It was then that I saw your add in the paper. After researching your product, I decided that it might be worth it to spend the extra money to get your lifetime guarantee.

One year and three hurricanes later, I am thrilled to report that the only water damage to my house was a little rain that came in through the vent in the roof. Many of my neighbors suffered water intrusion into their homes. I attribute my lack of damage to the Liquid Ceramic coating on my house. No water around the windows, no wet rugs—the interior of my home was bone dry.

I may decide to evacuate the house the next time a hurricane comes through, but I won't worry about water coming in. Does your company have any products for the roof?

Thanks for a great product!

Sincerely,

Ann Reinhart
